

Placement Year in the Engineering Industry

Job description:

We are looking for a student with a mechanical engineering background, who would like to gain hands-on experience in the engineering industry.

During the 12-month placement, you will work directly with our Plant Development team and get involved in plant design and manufacturing. You will also learn about SHJ's energy-saving technologies and partnerships with NHS Trusts.

Our placements ensure that students will leave with a strengthened skillset, a strong understanding of the medical gas industry and experience working in a dynamic team.

Location:

The role will take place in our Chesham office and the working hours will be 8:30am - 5:00pm. The role will also provide the opportunity to visit customer sites with SHJ engineers and the Plant Development team.

Salary:

£25,000 p/a

About SHJ:

SHJ is a leading supplier of medical gas systems, solutions and services in the UK and a market leader in remote monitoring and energy-saving technologies. This year SHJ will celebrate 55 years of service to NHS Hospital Trusts and the private sector across the UK, designing, installing and maintaining a wide range of medical gas systems.

At SHJ we pride ourselves on establishing long-term working relationships through the quality service we provide, outstanding customer support and by ensuring we stay competitive through delivering ongoing innovation and added value.

We invest extensively in Research and Development to remain at the forefront of our industry. Our in-house R&D team employs the latest AI protocols to design and produce intelligent plant controllers and monitoring systems to reduce risk, provide essential management data and, increasingly, to support independent predictive maintenance.

We are keen to support the next generation of medical gas engineers and are proud of our new scheme to support our growing team of young graduate engineers and programmers. As a new graduate, you can expect training and mentoring to develop your career wherever you want to take it.

The coronavirus pandemic has raised the profile of medical gas engineering in the UK and round the world as reliable hospital oxygen supply becomes ever more crucial. There's never been a better time to get into a core healthcare sector which offers such opportunity for challenge and growth – and to make a real difference to patients.

Application Closing Date: 01/09/22
