

Pipefitter

Location: South of England

Salary: £35,000 - £40,000 per annum + Company Van, Mobile Phone and Pension

About SHJ

SHJ Medical & Lab Gas Specialists is a leading provider of medical and laboratory gas pipeline systems, services and solutions across the UK. With nearly 60 years of industry experience, we are recognised for our technical expertise, commitment to quality and innovative approach to healthcare engineering.

We design, manufacture, install and maintain medical gas infrastructure for NHS Trusts, private hospitals, laboratories and research facilities nationwide. Through continued investment in research and development, we remain at the forefront of remote monitoring, energy-saving technologies and specialist gas systems.

The Role

We are looking for an experienced and motivated Pipefitter to join our growing installation team. This is an excellent opportunity to work on a variety of specialist projects within healthcare, laboratory and construction environments across the South of England.

The successful candidate will assist with the installation, testing, commissioning and certification of medical gas pipeline systems, ensuring all work is completed safely, efficiently and to the highest standards.

Working Hours: Monday to Friday, 8:00am to 4:30pm.

Key Responsibilities

As a Pipefitter, your duties will include:

- Installing medical gas pipeline systems in accordance with industry standards, project specifications and hospital requirements.
- Assisting with project planning and preparation.

- Identifying and requisitioning materials required for specific projects.
- Reviewing site information, drawings and operating constraints before commencing work.
- Carrying out first-fix and second-fix installations under the guidance of senior engineers.
- Assisting with testing, commissioning, certification and validation activities.
- Completing and submitting all required project documentation and records.
- Maintaining safe, clean and secure working environments at all times.
- Working collaboratively with customers, contractors and colleagues to ensure successful project delivery.

Skills & Experience

Previous experience in a pipefitting or mechanical installation environment is essential.

Experience within medical gas pipeline systems is desirable; however, full training will be provided to candidates with transferable skills from related industries.

Relevant experience may include:

- Mechanical building services
- Heating, ventilation and air conditioning (HVAC)
- Refrigeration and air conditioning
- Utilities and infrastructure
- Laboratory and scientific facilities
- Oil and gas installations
- Hospital engineering
- Industrial plant installation

Requirements

We are looking for someone who can demonstrate:

- Excellent attention to detail.
- Strong organisational and planning skills.
- A proactive approach to health and safety.
- Effective problem-solving abilities.
- A positive, can-do attitude.
- The ability to work independently and as part of a team.
- Strong communication and customer service skills.
- A self-motivated, disciplined and methodical approach to work.
- A full, clean UK driving licence.

Why Join SHJ?

Equal Opportunities

SHJ is committed to creating a diverse and inclusive workplace where everyone is valued and respected. We are proud to be an equal opportunities employer and welcome applications from all suitably qualified candidates regardless of background.
